

C19SAFE

Safeguards Assessment For Employers

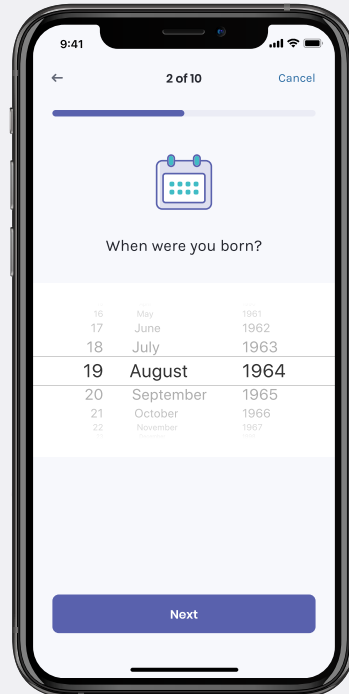

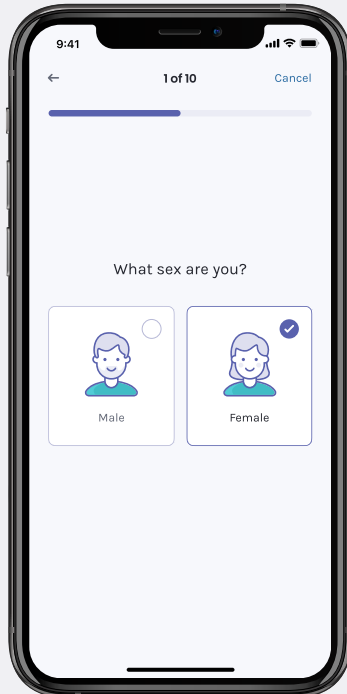

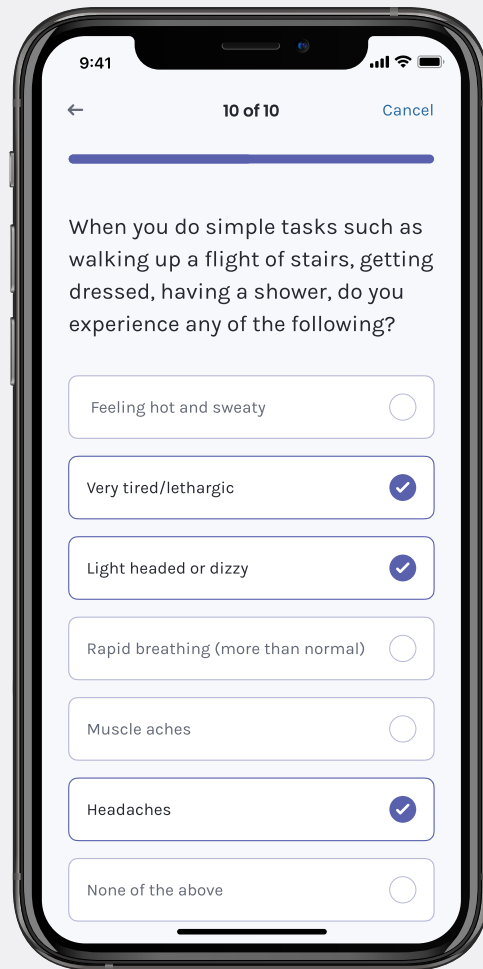

**The app to help you safely
manage return to work
through COVID-19**

May 2020

C19SAFE will help you to understand the risks across your workforce, providing alerts, notifications and guidance on next steps using the latest scientific advice.

- Safeguard your workforce as employees are reintroduced back to work following diagnosis or having experienced symptoms associated with the virus, including the provision of return-to-work assessments
- Adapt your approach according to changing advice and guidelines from the scientific community and the government
- Risk assess the team and identify those at highest risk
- Place orders for testing kits through an approved partner

C19SAFE is clinically validated and reviewed in collaboration with epidemiologists and clinicians from the Primary Care Stratified Medicine (PRISM) Research Group at the University of Nottingham

Benefits:

- Get people back to work safely and at the right time
- Reassure your workforce that it is safe to return to work, reduce anxiety
- Understand your overall risk profile with simple, aggregated evidence of your workforce's exposure to the virus
- Enable the employee to monitor their symptoms and spot early signs of deterioration
- Contribute to ongoing scientific research into managing the COVID-19 pandemic by anonymously sharing your data with the Primary Care Stratified Medicine (PRISM) Research Group at the University of Nottingham (<https://www.nottingham.ac.uk/research/groups/primarycarestratifiedmedicine/index.aspx>)

Delivered at cost to help you keep your employees SAFE
